

MR Prerequisite: Storage and Collection of Recyclables

Prerequisite – Required for all BD+C project types

This credit applies to

- BD+C: New Construction
- BD+C: Core & Shell
- BD+C: Schools
- BD+C: Retail
- BD+C: Data Centers
- BD+C: Warehouses & Distribution Centers
- BD+C: Hospitality
- BD+C: Healthcare

INTENT

To reduce the disproportionate burden of landfills and incinerators that is generated by building occupants' waste hauled to and disposed of in landfills and incinerators through reduction, reuse and recycling service and education, and to conserve natural resources for future generations.

REQUIREMENTS

Provide dedicated areas accessible to waste haulers and building occupants for the collection and storage of recyclable materials for the entire building. Collection and storage areas may be separate locations. Recyclable materials must include mixed paper, corrugated cardboard, glass, plastics, and metals. Take appropriate measures for the safe collection, storage, and disposal of two of the following:

- batteries
- mercury-containing lamps
- electronic waste

GUIDANCE

There are no substantive changes to the prerequisite requirements; refer to the LEED v4 reference guide.

Beta Update

Retail projects should now follow guidance for New Construction. Retail-specific requirements are no longer applicable.

Connection to Ongoing Performance

- LEED O+M MR prerequisite Waste Performance: This prerequisite is a strategy that can help achieve the MR prerequisite: Waste Performance in the v4.1 O+M rating system.
