Intent: Minimize potential health effects to occupants by selecting less hazardous products.

Summary: This feature requires the restriction of hazardous or harmful ingredients in cleaning, disinfection and sanitization products.

Issue: Commercial cleaning products may contain ingredients that may degrade the indoor air quality and are suspected to be hazardous to human health.⁷ Some products may emit substances that irritate the nose, eyes, throat and lungs and can cause or trigger asthma attacks.⁸ Moreover, the interactions between cleaning agents, microbes and public health are diverse and complex, and we are just beginning to better understand them.^{27,28}
