

C05 ENHANCED OCCUPANT SURVEY | O (MAX : 4 PT)

Intent : Build on minimum occupant survey requirements with enhanced and customized questions to comprehensively evaluate and respond to the experience and self-reported health and well-being of building users.

Summary : This WELL feature requires projects to build on minimum occupant survey requirements by collecting and responding to more in-depth and customized information from building users on their health, well-being and satisfaction with their environment including topics related to WELL strategies, both before and during occupancy.

Issue : Given the wide diversity in the design, operation and use of built spaces, it's difficult to gauge which design, policy and programmatic approaches will benefit the health and well-being of the most individuals in a space.^{1,2} For example, decision-makers and users of the space often experience things differently.¹ Employers do not often put methods in place to systematically gather input on the experience of their employee, such as satisfaction with policies, design and maintenance or overall health.^{3,4,5}

Solutions : Occupancy surveys measure the extent to which a building promotes user health and comfort.^{6-8,9-11} Specifically, psychometrically validated surveys evaluate building users' experience, frame sensitive questions appropriately and measure what they are intended to measure.^{12,13} Incorporating a range of survey topics, and utilizing both pre- and post-occupancy surveys, provides a comprehensive picture of which interventions impact building users' satisfaction.^{11,14,15} Moreover, interviews and focus groups provide key insights not captured in surveys.^{16,17,18} Stakeholders can use results to identify priority interventions to make spaces healthier and more productive.¹⁹ Offering the opportunity to provide feedback, along with an action plan to address dissatisfaction, can improve employee morale and retention while creating a healthier environment for all.^{5,20,21,22-25}

PART 1 UTILIZE ENHANCED SURVEY (MAX : 1 PT)

For All Spaces:

1: Enhanced survey administration

For projects with ten or more eligible employees, the following requirements are met:

- a. Meet Feature C04 Part 1 using a third-party or pre-approved survey provider.
- b. Address at least one of the topics listed in Appendix C2 through a minimum of three additional survey questions utilizing a pre-approved survey provider listed on [Reference](#).

2: Result analysis and reporting

The project or organization meets the following requirements:

- a. Based on survey results, investigate correlations, inferential statistics (such as multivariate analysis), or other analyses beyond descriptive statistics.
- b. Submit the following through the platform annually:
 1. Aggregated, anonymized survey results for the additional topics selected from Appendix C2.
 2. Results of enhanced analysis.

PART 2 UTILIZE PRE- AND POST-OCCUPANCY SURVEY (MAX : 1 PT)

For All Spaces:

1: Baseline and annual survey administration

The project or organization meets the following requirement:

- a. Prior to achieving a WELL milestone, administer a survey for eligible employees using the same [Reference](#) that will be used for Feature C04.

2: Result analysis and reporting

The project or organization meets the following requirements:

- a. Compare results from the baseline survey against subsequent survey results.
- b. Submit aggregated, anonymized survey results through the platform on the following:
 1. Aggregated, anonymized results of the baseline survey.
 2. Comparison between the results of the baseline and annual surveys.
 3. Total number of employees invited to complete the survey and number of employees who completed the survey, each time it was administered.
 4. Date each survey started and finished.
 5. Location where each survey was administered.
 6. Project type.
 7. Level of WELL achievement, if applicable
 8. Sociodemographic information (age and gender at a minimum).

Note :

Additional baseline survey is not required at recertification.

PART 3 IMPLEMENT ACTION PLAN (MAX : 1 PT)

For All Spaces:

1: Satisfaction Targets

The project or organization creates and implements a plan that addresses the following:

- a. Defines target satisfaction levels reported in the annual survey.

2: Improvement Strategies

The project or organization submits on an annual basis:

- a. Comparison of satisfaction results to aspirational targets.
- b. Improvement strategies to be implemented, if applicable.

PART 4 FACILITATE INTERVIEWS, FOCUS GROUPS AND/OR OBSERVATIONS (MAX : 1 PT)

For All Spaces:

1: Administration of interviews, focus groups and/or observations

The project or organization annually conducts "evaluations" (defined here as stakeholder interviews, focus groups and/or observations) that meet the following requirements:

- a. Are conducted and analyzed by a professional experienced in qualitative research.
- b. Comprise a culturally representative sample of the population.
- c. Discuss the impact that the built environment and organizational initiatives have on occupant health and well-being.
- d. Protect participant privacy and identity.

2: Result analysis and reporting

The project or organization meets the following requirements:

- a. Compare results from the evaluations to the survey results, if applicable.
- b. Annually submit aggregated, anonymized results of the evaluations through the platform on the following:
 1. Comparison between the results of the evaluations and the survey results, as applicable.
 2. Total number of employees and number of employees who participated in the evaluations.
 3. Date the evaluations started and finished.
 4. Project location(s).
 5. Project type(s).
 6. Level of WELL achievement, if applicable.
 7. Sociodemographic information of participants (age and gender at a minimum).
